

Knowledge Base: Erase an Unsupervised iPad/iPhone and Enroll into Microsoft Intune

Audience: Under Armour Retail Store Teammates

Purpose: This article explains how to erase an existing iPad/iPhone and enroll it into the Microsoft Intune Mobile Device Management (MDM) solution.

Before You Begin

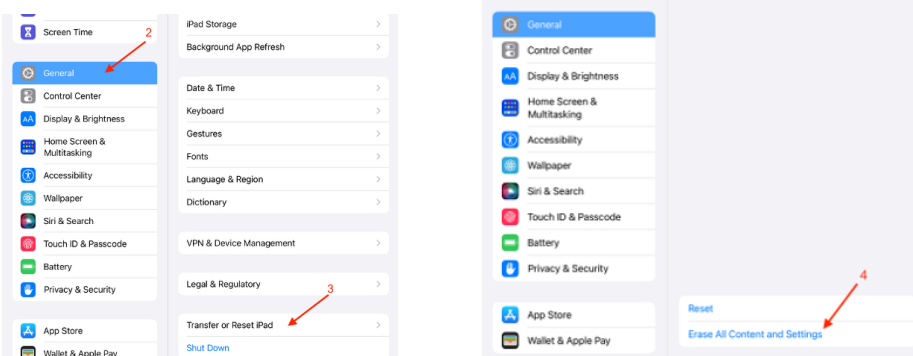

- Back up any required data before erasing the device.
- Ensure the iPad has at least 50% battery or is connected to power.
- Connect to a reliable Wi-Fi network.
- Erasing the iPad permanently removes all apps, data, and settings.

Procedure

Step 1: Open Settings on the iPad.

Step 2: Go to General > Transfer or Reset iPad.

Step 3: Select Erase All Content and Settings.

Step 4: Review the information and tap Continue.

Step 5: Enter the current device passcode.

Passcode for This iPad

Enter the passcode used to unlock this iPad.

Passcode for This iPad

Enter the passcode used to unlock this iPad.

Are you sure you want to erase all media, content, and settings? This cannot be undone.

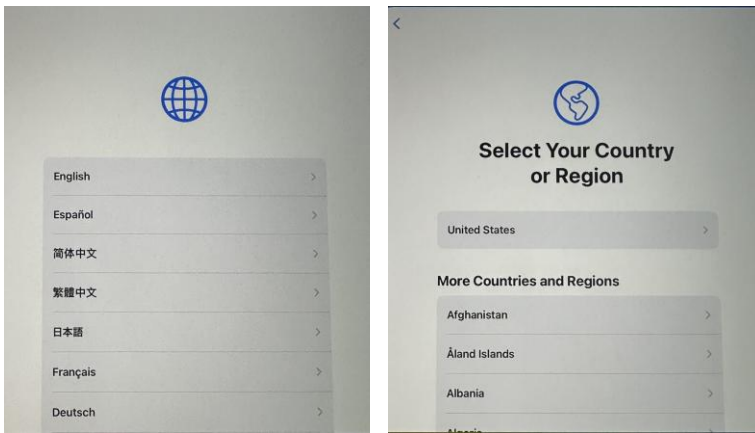

Cancel

Erase iPad

Step 6: Confirm by tapping Erase iPad and wait for the device to restart.

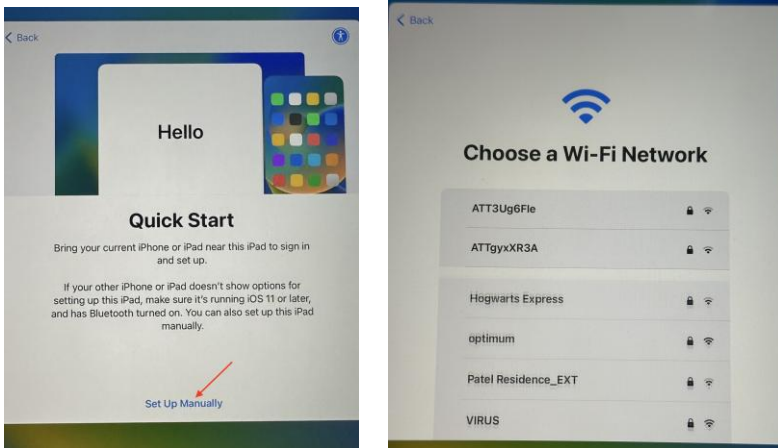

Steps to enroll Unsupervised devices to Intune MDM solution :

Step 7: Choose your preferred language.

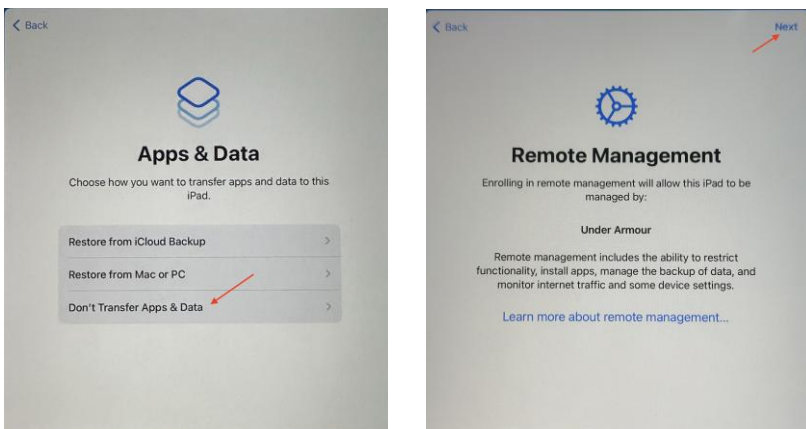

Step 8: Select the appropriate Country or Region.

Step 9: On the Quick Start screen, tap Set Up Manually.

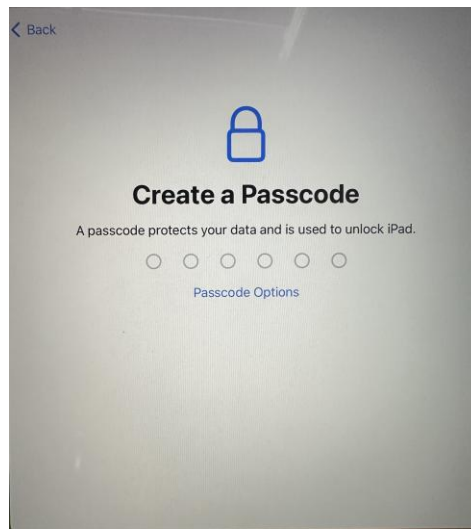

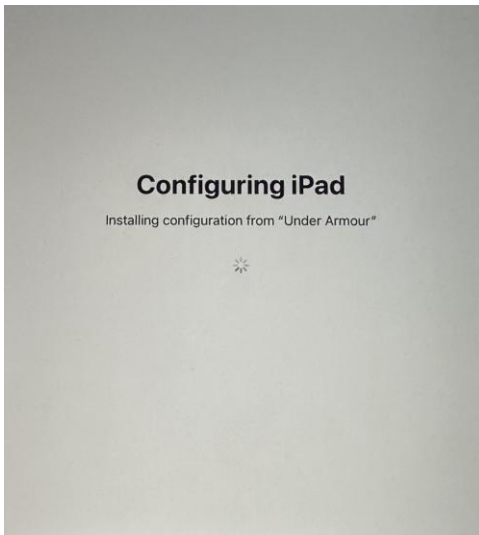

Step 10: Connect to a Wi-Fi network.

Step 11: On Apps & Data, select Don't Transfer Apps & Data.

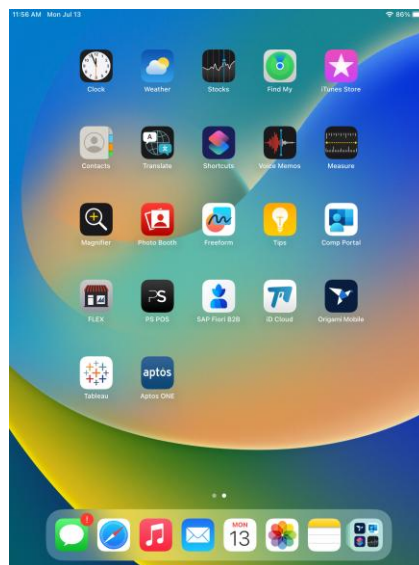

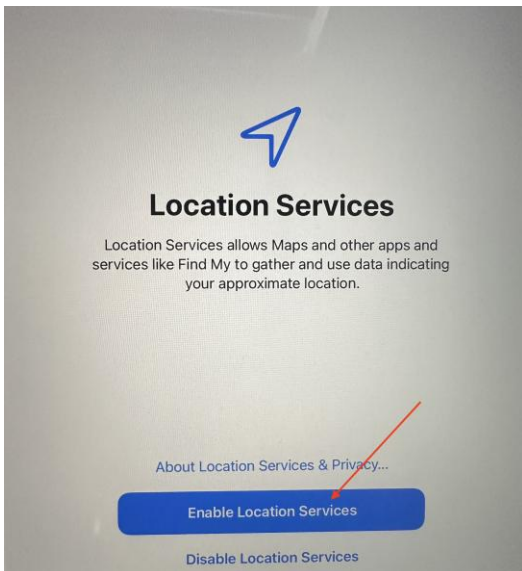

Step 12: When the Remote Management screen appears, verify it shows Under Armour and tap Next.

Step 13: Wait while the iPad downloads the management profile and displays Configuring iPad.

Step 14: Create a passcode that complies with your organization's requirements.

Step 15: Enable Location Services when prompted.

Step 16: Wait for the Home screen to appear and verify Company Portal and retail apps begin installing automatically.

Verification

- The Home screen loads successfully.
- Company Portal is installed.
- Retail applications begin installing automatically.
- The device is managed by Microsoft Intune.
